An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The title of the invention has been changed to: "Self-compensating fiber optic flow sensor having an end of a fiber optics element and a reflective surface within a tube".

The following is an examiner's statement of reasons for allowance: The prior art fails to teach a fiber optics transducer for measuring shear force or flow rate, among other features, comprising: a floating head; a reference surface; a cantilever extending between the reference surface and the floating head; and a plurality of integral fiber optic sensors arranged to sense relative motion between the reference surface the floating head with each of the fiber sensor comprising a fiber optic element having an end within a tube, and a reflective surface positioned by the tube at a location spaced from an end of the fiber optic element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

I) Skala 3,915,570 discloses an optical monitoring system having optical fibers within tubes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Que T. Le whose telephone number is (571) 272-2438.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Epps Georgia, can be reached on (571) 272-2328. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
